## Swimming Pool System

Don't leave yourself or the pool owner open to litigation by having an unprotected concrete or brick swimming pool shell on your construction site!

Our Swimming Pool System fits around the entire pool to minimize risk to workers or the public.

Replace cumbersome Fencing or scaffolding which can cause damage to the pool, our system requires no drilling eliminating the need for patching later.

Mesh Kick Boards can be fitted as an added shield; these are highly recommended if the pool under construction is holding a level of rain water they also help keep sand and rubbish out

*Mesh Kick Boards*

- Competitive rates
- Height Safety Solution Specialists
- Fully trained and accredited installation crews.
- Certified products that fully comply with regulations
