Re Roof System

Domestic - Metal Roofs

- 1) The function of Re Roof Guardrail is to be able to slide one post at a time out of the way, so that roof sheets can be moved or replaced, while leaving the Guardrail system intact to provide protection for the roof worker.
- 2) Dutch Gables
Re Roof System can be installed in front of Dutch Gables to allow carpenters and painters to complete their work after the roof has been sheeted. The system provides a safe working area and prevents falls.
